## BOOK REVIEWS

*Creation Scientists Answer Their Critics* by Duane T. Gish. 1993. Institute for Creation Research. El Cajon, CA 451 pages. \$16.95.

Reviewed by Emmett L. Williams\*

Many creation scientists, particularly Duane Gish and Henry Morris, have been subject to vicious attacks from hard-core evolutionists. Often these attacks are *ad hominem* in nature and center on such untrue comments as creationists quote evolutionists out of context or misquote evolutionists. These tar brush implications are that creationists are basically dishonest, incompetent scientists or just plain liars. Although some evolutionists try to answer creationist arguments, many of them resort to name-calling and avoid scientific issues whenever possible. Dr. Gish examines several of these

antirealist efforts and provides effective answers to their charges.

A brief history of the modern creationist challenge to the dogma of evolution is given. The reaction of evolutionists to the work of scientific creationists is noted. Gish (p. 19) claims:

Evolutionists have reacted vigorously, even viciously, to these threats to their monopolistic control of science and education. They apparently are determined to use whatever means they feel are necessary to blunt and eventually to destroy the efforts of creation scientists to make known the empty rhetoric that makes up evolutionary stories and the nature of the scientific evidence that supports creation. . . .

Creation scientists are accused of promoting religion, not science. Gish examines this claim and concludes

\*5093 Williamsport Drive, Norcross, GA 30092-2124.
